

4Trans Dunnage air bag

The ideal solution for load securement and void filling across various modes of transportation.

4Trans by CargoTuff is an internationally certified dunnage bag engineered for side-to-side cargo securement and void-filling applications across truck, container, rail, and ocean transport.

Like all CargoTuff dunnage bags, 4Trans is crafted from virgin resin, with fabric extruded, woven, and laminated in-house to meet the highest industry standards. Each bag features a standard spring-loaded filling valve for quick and efficient inflation and deflation.

Additionally, the PAM (Portable inflation machine) is fully compatible, ensuring easy and efficient installation.

Technical Specifications

- Outer Material- Woven Polypropylene
- Weight- -57gr/m2 + 15gr/m2 Lamination
- Inner Material- Co-extruded Polyethylene
- Weight 55 micron
- Max. Operating Pressure- 2 PSI
- Burst Pressure- 6 PSI
- Reusable spring loaded valve
- Inflation time- Varies on bag size void size and air supply

Sizes

- 36x36, 36x48, 36x72, 36x84, 48x48, 48x72, 48x84, 48x96

Printing

- 4Trans Printing

Bag Color

- White

- ✓ Sustainable
- ✓ Recyclable
- ✓ Internationally Certified
