

## Level 1 Dunnage air bag

A reusable dunnage bag designed for secure cargo restraint in over-the-road and intermodal transportation.

An AAR-verified, cost-effective, and user-friendly dunnage bag designed to secure cargo in lateral voids within truck trailers and ocean containers for intermodal transportation.

Like all CargoTuff dunnage bags, these are crafted from virgin resin, with fabric extruded, woven, and laminated in-house to ensure top-tier quality standards. Each bag comes equipped with a standard spring-loaded filling valve for quick inflation and deflation.

Additionally, our PAM (Portable inflation machine) is fully compatible, ensuring easy and efficient installation.

### Technical Specifications

- Outer Material- Woven Polypropylene
- Weight- -75gr/m2 + 20gr/m2 Lamination
- Inner Material- Co-extruded Polyethylene
- Weight 62 micron
- Max. Operating Pressure- 2.6 PSI
- Burst Pressure- 8 PSI
- Reusable spring loaded valve
- Inflation time- Varies on bag size void size and air supply

### Sizes

- 36x36, 36x48, 36x72, 36x84, 48x48, 48x72, 48x84, 48x96

### Printing

- Cargotuff

### Bag Color

- Green

- ✓ Sustainable
- ✓ Recyclable
- ✓ AAR Certified
